Experience

Alexandria for Programming

Senior Full Stack Developer

Jan 2022

Alexandria

- I mentored a team of juniors, and we developed web apps based on clean coding and reusability practices using Django, VueJs, SQL Server, IIS and Flutter.
- I worked on turning desktop apps to web-based apps for a firm for oils and handling QA, production and packaging modules and integrating with other software around the firm including PLC and data transmissions, we developed using their SQL Server database with only light changes to schema, python for handling data manipulation, analysis for reports and Django - VueJs for fast productivity and deployment on IIS.
